Bibliographical Contributions

FROM THE
LLOYD LIBRARY,
CINCINNATI, OHIO.

No. 1, January, 1911,
Issued quarterly.

Catalogue of the Periodical Literature in the
Lloyd Library.

By
MISS EDITH WYCOFF,
Assistant Librarian (in charge of the Periodicals).

PUBLISHED BY THE LLOYD LIBRARY,
No. 309 W. Court Street, Cincinnati, Ohio.

PREFACE.

The Lloyd Library is devoted almost exclusively to Botany, Materia Medica, and Pharmacy, with a section on Eclectic Medicine. It contains at a conservative estimate twenty-five thousand volumes, which is possibly the most extensive collection of books and periodicals directly pertaining to these subjects. It is now in extensive use, as evidenced by the number of persons who consult its contents, as well as by the increasing inquiries for bibliographical information concerning special subjects.

It is the intention to publish quarterly catalogues devoted to the various departments of our library, of which this, the introductory number, is devoted to the periodical literature. The object of these catalogues is twofold :

First—To let it be known what publications are now in our library, so that persons wishing to consult them may know where they may be seen.

Second—To indicate the publications we do not have, but desire to obtain, hoping that correspondents may be able to supply them. We shall be very glad to hear from any one who can furnish a missing part, or help to complete a set, and shall be thankful for copies of any publication on these subjects not now in our catalogue.

These Bibliographical Contributions are to be issued regularly, it being designed that the next number shall contain a catalogue of the general Floras of Europe and those of Great Britain.

THE LLOYD LIBRARY.

CATALOGUE OF PERIODICAL LITERATURE IN THE LLOYD LIBRARY, CINCINNATI, OHIO.

Explanations.—We have arranged this catalogue so that the condition of our sets is indicated by the type used and may be determined at a glance.

All publications listed in the larger type are received regularly as issued, and if in this type the set is complete to date.

If listed in light-faced type, current numbers are received as issued, but there are numbers missing from the set as indicated.

If in small type, this indicates that the set is either completed or is not currently received: if heavy-faced type, the publication is complete in our library.

If in the light-faced type, this indicates that parts are missing and that the publication is not currently received by us.

Publications, United States Department of Agriculture.

We are particularly gratified with the sets that we have of the publications of the United States Department of Agriculture, and are grateful to Dr. Frederick V. Coville, who has not only had our library placed on the list of those receiving current publications, but has secured many back numbers for us. Of the 4,033 numbers of publications that have been issued by the Department of Agriculture in the sets we preserve, we have 3,906. We are particularly anxious to secure the few lacking to complete our sets, and shall be grateful to any one who can supply even a single one of them. As soon as our sets are completed they are bound, so there will be no risk of the possible loss of any separate publications in future.

A few separates on hand.

Publications of the Agricultural Experiment Stations.

No department of our library is harder to complete than that embracing the publications of the various agricultural stations. They are distributed gratis and not usually preserved by the recipients, and not handled by book-dealers, hence it is a most difficult task to complete sets. Most of our publications have been obtained through the courtesy of the directors of the various stations, to whom we wish to extend our thanks. As rapidly as we get a portion of a set completed, we bind it, hence there is no risk of the loss of the separate bulletins in future, which is always the case if kept in pamphlet form.

The following list is we think a complete summary of all publications that have been issued by the agricultural experiment stations. It has been made up from the best information at our command, but in case of errors we shall be very glad to be advised. We think it will prove a very convenient summary for other libraries that are making collections of these publications. Of the 9,154 of issues that have been published we have 8,287. We are particularly anxious to procure the few that are missing to complete our sets.

The publications that are issued regularly are printed in large type; heavy face type indicates that the set is complete in our library; light face type indicates that some are missing from our set.

No. 309 W. Court Street, Cincinnati, Ohio.

THE LLOYD MUSEUM

This building is now devoted exclusively to a museum of botany, embracing an herbarium and a very large collection of mycological specimens.

INTRODUCTION.

The Lloyd Library is devoted almost exclusively to Botany, Materia Medica, and Pharmacy, with a section of Eclectic Medicine. It contains at this time 32,434 volumes, which is possibly the most extensive collection of books and periodicals directly pertaining to these subjects. The pamphlets, of which there are many thousands, are systematically arranged by authors. From twenty-five to fifty of them are placed in a cover and each cover is counted as one volume.

In the Lloyd Library there has been compiled a catalogue of the various books and their editions, pertaining to our subjects, systematically arranged by authors. This catalogue has been made from all available sources, such as Jackson's "Guide to the Literature of Botany", Pritzel's "Thesaurus Literaturae Botanicae", "Botanische Centralblatt", "Index Catalogue of the Library of the Surgeon General's Office", and book notices in various journals, and its compilation has been a work requiring several years of labor. It is systematically kept up to date, the new entries being made as the books appear. This catalogue is typewritten on what is known as the loose leaf ledger system, so that the sheets can be taken out and the entries made in their proper place and new sheets inserted. The catalogue contains 3,087 sheets, with 64,436 entries, representing approximately 43,000 volumes and 21,000 pamphlets. It is probably the most complete bibliography of the subjects that has ever been brought together.

If this catalogue were printed in its entirety it would be a most convenient reference book for libraries and authors, but such a publication would involve an expenditure and labor beyond the modest resources of our institution.

However, in order that the work done in our library on this catalogue may be available to others, it is our intention to gradually publish bibliographies of the various sections of the library, taken from our catalogue. The books that are now in our library are indicated by the shelf numbers printed in heavy faced type, pamphlets by a heavy faced star, and may be seen at a glance in looking through the catalogue. It is gratifying to us to be able to show such a large proportion of them now in our library, and we are systematically endeavoring to acquire those that are missing.

Two sizes of type are used, the large size indicating books or volumes and the small size indicating the pamphlets. We only catalogue as pamphlets those that have been issued as separate publications, or those that are taken from some book or serial publication not devoted exclusively to the subjects of our library. A large number of pamphlets which are merely excerpts from botan-

ical and pharmaceutical publications are not catalogued. Of course, when a book is not in our library, we can only judge by the number of pages or the title, and it is possible that we may have indicated some publications as books which are pamphlets, or vice versa.

Where the book is in our library the data as to number of pages, dates of editions, etc., have been taken from the book and, we think, can be relied upon as being accurate. Where the book is not in our library, the data have been gathered from other sources and we must disclaim any responsibility for errors. We have indicated the number of pages and the number of plates, but in counting the pages we count only the body of the book, taking no account of preface pages, etc. Our object is to make these catalogues a practical index of the books and pamphlets. Each entry represents a separate publication.

We question the utility of the custom resorted to by some libraries of making entries in their catalogues of what should really be cross index matter and giving them the same prominence they give to the volume. Some catalogues which make a very pretentious showing would be far less imposing and much more useful if they were catalogues of books in their collection instead of catalogues of a lot of data regarding the books that are only of secondary importance and should have no prominent place in such a work

DIVISIONS OF THE LLOYD LIBRARY.

The books contained in the Lloyd Library are arranged systematically according to a plan that has been formulated by the library. It is quite obvious that the abridged plan of dividing botanical books, as given in the Dewey Decimal System, is not carried out in sufficient detail for a collection of this kind, and we have therefore had to devise a more extensive plan of divisions and subdivisions. This is based primarily on Jackson's "Guide to the Literature of Botany", with the exception that in classifying the cryptogamic works, geography is considered secondary to the general subject of the book. Thus, the present catalogue, embracing the floras of England, does not contain works devoted specially to the cryptogamic flora of England, which comes under cryptogamic subjects (viz., Section II).

We divide each general department of the library (Botany and Pharmacy) into twenty-six sections, according to the letters of the alphabet. The general subjects of the twenty-six sections of the botanical department are as follows:

- A. Bibliography, History, Biography, Terminology, Encyclopaedias, Dictionaries, Directories, etc.
- B. Introductory Botany.
- C., D., and E. Physiological and Morphological.
- F. Phanerogams, General Descriptions.
- G. Phanerogams, Monographs.
- H. Cryptogams.
 - I. Palaeobotany, Plant Distribution, Miscellaneous.
 - J. Economic Botany.
- K. Europe, (General works.)
- L. Great Britain and Ireland.
- M. Austria-Hungary, Belgium, Netherlands, Switzerland.
- N. France.
- O. Germany.
- P. Italy, Greece, Turkey, Spain, Portugal.
- Q. Arctic Regions, Iceland, Russia, Scandinavia.
- R. North America, Mexico, West Indies, Central America.
- S. South America, Antarctic Regions.
- T. Asia.
- U. Oceanica, Polynesia.
- V. Africa.
- W. Botanical Gardens, Museums, Parks.
- X. Voyages and Travels.
- Y. Agriculture and Horticulture.
- Z. Biology and Zoology.

Each section of the Library is again subdivided to the second letter. The present catalogue embraces only the sections K and L, which are subdivided as follows:

- K. Europe (General).
- KA. The Alps.
- L. Great Britain.
- LA. British Grasses.
- LB. British Trees.
- LF. England.
- LG. Middlesex, London.
- LH. Southeastern.
- LI. Southwestern.
- LJ. West Midland.
- LK. North and South Midland.
- LL. Eastern.
- LM. Northwestern and Yorkshire.
- LN. Northern.
- LO. Wales.
- LP. Scotland.
- LO. Northern Scotland.
- LR. North Central Scotland.
- LS. South Central Scotland.
- LT. Southern Scotland.
- LU. Ireland.
- LV. Ulster.
- LW. Connaught.
- LX. Leinster.
- LY. Munster.

By this arrangement we collect together all the books on the shelves relating to any part of the subject. The authors' numbers are in keeping with the key given in "The Cutter-Sanborn alphabetic-order table."

By this system, any one knowing the author and subject of a book can find it on the shelves without even consulting the catalogue. Thus, in looking up Babington's Manual of British botany, knowing the book is in section L. of English Botany, if you refer to the shelf in that section, following the index letters to B you will find the nine editions under the initial serially arranged. If you want a special subject, for instance the Flora of Middlesex County, in the section LC. you will find all the books we have on the subject brought together.

We believe that the system we have adopted for the Lloyd Library is the most convenient and practical that has been devised and is capable of indefinite expansion without derangement.

THE LLOYD LIBRARY AND MUSEUM.

This institution is legally a stock company, the stock being owned and the institution supported by Curtis G. and John Uri Lloyd. Mr. C. G. Lloyd has erected the building and supports the botanical section, and Professor John Uri Lloyd supports the pharmaceutical department. The building and contents are transferred to the stock company, and funds are provided for its continuance when the life work of its builders is finished. It will never be sold, and will always be a free and public institution for the benefit of science.

The library building was erected in the winter of 1907-1908. It is four stories, 22½ x 72 feet. It is devoted exclusively to Botany and Pharmacy (with a section of Eclectic Medicine), and contains a collection of books which is among the largest on these subjects. The library now contains 33,242 volumes. While it may never be accomplished, yet it is the ambition of the builders to make The Lloyd Library in time a practically complete library of its subjects.

PUBLISHED BY THE LLOYD LIBRARY,
No. 309 W. Court Street, Cincinnati, Ohio.

INTRODUCTION.

The Lloyd Library at the present time contains 36,011 volumes. It is devoted almost exclusively to Botany, Materia Medica, and Pharmacy, with a section of Eclectic Medicine.

The general plan of the divisions of the Library was explained in detail in the 2d issue (April, 1911) of this publication.

This number embraces the section O, which is subdivided as follows:

Germany.

- O. General Works.
- OA. Trees.
- OF. Prussia. North Germany.
- OG. Central Germany.
- OH. Bavaria.
- OI. South Germany.
- OJ. Northwest Germany.

Books or pamphlets that are in the Lloyd Library are indicated by heavy-face shelf numbers or by a heavy-face star.

THE LLOYD MUSEUM

This building is now devoted exclusively to a museum of botany, embracing an herbarium, a very large collection of mycological specimens, and the mycological library.

INTRODUCTION.

The Lloyd Library at the present time contains 36,427 volumes. It is devoted almost exclusively to Botany, Materia Medica, and Pharmacy, with a section of Eclectic Medicine.

The general plan of the divisions of the Library was explained in detail in the 2d issue (April, 1911) of this publication.

This number embraces the section P, which is subdivided as follows :

- P. Italy.
- PA. Northern Italy.
- PB. Central and Southern Italy.
- PC. Islands. Sicily, Malta, Sardinia, Corsica.
- PE. Spain.
- PF. Islands. Canary and Balearic.
- PH. Portugal.
- PI. Islands. Madeira, Azores, Cape Verde.
- PL. Greece.
- PN. Grecian Islands.
- PP. Turkey in Europe.
- PR. Bulgaria, Montenegro, Moldavia, Roumania, Servia,
Wallachia

Books or pamphlets that are in the Lloyd Library are indicated by heavy-face shelf numbers or by a heavy-face star.

Embracing Botanical Section Q of The Lloyd Library

EDITH WYCOFF,
Librarian

PUBLISHED BY THE LLOYD LIBRARY,
No. 309 W. Court Street, Cincinnati, Ohio.

INTRODUCTION.

The Lloyd Library at the present time contains 37,081 volumes. It is devoted almost exclusively to Botany, Materia Medica, and Pharmacy, with a section of Eclectic Medicine.

The general plan of the divisions of the library was explained in detail in the second issue (April, 1911) of this publication.

Many of the titles in this catalogue, the original of which are in the Russian language (which is not read by our librarian), are usually given either in English or German, according to the source from which the original record was taken.

Owing to the illness of the librarian, no number was issued in July, 1912.

This number embraces the section Q, which is subdivided as follows:

- QA. Arctic Regions.
- QB. Iceland.
- QC. Scandinavia.
- QE. Denmark.
- QF. Denmark, Local.
- QG. Norway.
- QH. Norway, Local.
- QI. Sweden.
- QJ. Sweden, Local.
- QK. Russia.
- QL. Finland, Lapland.
- QM. Great Russia.
- QN. Baltic Provinces.
- QO. East and West Russia.
- QP. Russian Poland.
- QR. Caucasia.

Books or pamphlets that are in the Lloyd Library are indicated by heavy-face shelf numbers or by a heavy-face star.

Bibliography relating to the Floras of Arctic Regions, Iceland, Scandinavia, Denmark, Norway, Sweden, Russia, Finland, Lapland, Russian Poland, and Caucasia.

Embracing Botanical Section R of The Lloyd Library

EDITH WYCOFF,
Librarian

PUBLISHED BY THE LLOYD LIBRARY,
No. 309 W. Court Street, Cincinnati, Ohio.

INTRODUCTION.

The Lloyd Library at the present time contains 37,175 volumes. It is devoted almost exclusively to Botany, Materia Medica, and Pharmacy, with a section of Eclectic Medicine.

The general plan of the divisions of the Library was explained in detail in the second issue (April, 1911) of this publication.

The data relative to publications not in our Library have been gathered from various sources, as stated in our second issue. In preparing this issue we have compared also "Catalogue of the Library of the British Museum," Index to Botanical Literature of the "Bulletin of the Torrey Club," and Britton's "List of State and Local Floras of the United States and British America."

This number embraces section R, which is subdivided as follows:

- R. North America.
- RC. Greenland.
- RD. Alaska.
- RE. Canada.
- RF. United States.
- RI. New England.
- RJ. Eastern States.
- RK. Lake States.
- RL. Southern States.
- RM. Southwestern States
- RN. Western Prairie States.
- RO. Rocky Mountain States.
- RP. Pacific States.
- RQ. Mexico.
- RR. Central America.
- RS. West Indies.

Books or pamphlets that are in the Lloyd Library are indicated by heavy-face shelf numbers or by a heavy-face star.

Bibliography relating to the Floras of North America and the West Indies.

INTRODUCTION

The Lloyd Library at the present time contains 37,469 volumes. It is devoted almost exclusively to Botany, Materia Medica, and Pharmacy, with a section of Eclectic Medicine.

The general plan of the divisions of the Library was explained in detail in the second issue (April, 1911) of this publication.

This number embraces section S, which is subdivided as follows:

- S South America.
- SA Panama.
- SB Venezuela.
- SC Colombia (New Granada).
- SD Guiana.
- SE Ecuador.
- SF Peru.
- SG Bolivia.
- SH Brazil.
- SI Paraguay.
- SJ Uruguay.
- SK Argentina.
- SL Chile.
- SM Patagonia.
- SX Islands.
- SO Antarctic Regions.

Books or pamphlets that are in the Lloyd Library are indicated by heavy-face shelf numbers or by a heavy-face star.

EDITH WYCOFF,
Librarian

PUBLISHED BY THE LLOYD LIBRARY,
No. 309 W. Court Street, Cincinnati, Ohio.

INTRODUCTION.

The Lloyd Library at the present time contains 38,169 volumes. It is devoted almost exclusively to Botany, Materia Medica, and Pharmacy, with a section of Eclectic Medicine.

The general plan of the divisions of the Library was explained in detail in the second issue (April, 1911) of this publication.

The data relative to publications not in our library have been gathered from various sources, as stated in our second issue.

This number embraces section T, which is subdivided as follows:

- T Asia.
- TA Siberia.
- TB Japan.
- TC China. Korea.
- TD Farther India. Cochin China. Siam.
- TE India.
- TF Afghanistan. Turkestan, Baluchistan.
- TG Persia.
- TH Arabia.
- TI Turkey in Asia. Palestine.

Books or pamphlets that are in the Lloyd Library are indicated by heavy-face shelf numbers or by a heavy-face star.

Embracing Botanical Section U of The Lloyd Library

EDITH WYCOFF,
Librarian

PUBLISHED BY THE LLOYD LIBRARY,
No. 309 W. Court Street, Cincinnati, Ohio.

INTRODUCTION.

The Lloyd Library at the present time contains 38,532 volumes. It is devoted almost exclusively to Botany, Materia Medica, and Pharmacy, with a section of Eclectic Medicine.

The general plan of the divisions of the Library was explained in detail in the second issue (April, 1911) of this publication.

The data relative to publications not in our library have been gathered from various sources, as stated in our second issue.

This number embraces section U, which is subdivided as follows:

- U Oceanica.
- UA Malaysia.
- UB Sunda.
- UC Australasia.
- UD Australia.
- UE New Guinea.
- UF Polynesia.
- UG Isolated Islands.

Books or pamphlets that are in the Lloyd Library are indicated by heavy-face shelf numbers or by a heavy-face star.

Embracing Botanical Section V of The Lloyd Library

EDITH WYCOFF,
Librarian

PUBLISHED BY THE LLOYD LIBRARY,
No. 309 W. Court Street, Cincinnati, Ohio.

INTRODUCTION.

The Lloyd Library at the present time contains 39,607 volumes. It is devoted almost exclusively to Botany, Materia Medica, and Pharmacy, with a section of Eclectic Medicine.

The general plan of the divisions of the Library was explained in detail in the second issue (April, 1911) of this publication.

The data relative to publications not in our library have been gathered from various sources, as stated in our second issue.

This number embraces Section V, which is subdivided as follows:

- V Africa.
- VA North Africa.
- VB Egypt.
- VC Abyssinia.
- VD Morocco.
- VE Algeria.
- VF North Central Africa.
- VG South Central Africa.
- VH South Africa.
- VI Islands.

Books or pamphlets that are in the Lloyd Library are indicated by heavy-face shelf numbers or by a heavy-face star.
